

IMPORTANT INFORMATION

Your Vehicle Registration or Renewal Fees may be affected by the implementation of the Transportation Funding Act of 2015 (HB 170).

ALTERNATIVE FUEL VEHICLES

Alternative Fuel Vehicles are now defined as vehicles fueled solely by electric, natural gas, propane, bi-fuel, and dual fuel including hybrid-electric vehicles. These vehicles are also eligible for the Alternative Fuel License Plate but may opt for another type of plate instead.

Please note: Many flex fuel and fuel mixture vehicles are no longer classified as Alternative Fuel Vehicles. Therefore these vehicles are no longer eligible for an Alternative Fuel Vehicle license plate upon renewal. However, such vehicles will not be subject to the Alternative Fuel fee referenced below.

Any Alternative Fueled Vehicle, except a vehicle utilizing natural gas or propane, regardless of its type of license plate, will annually be assessed:

Non-Commercial Vehicle	\$200.00 Alternative Fuel Vehicle Registration and Renewal Fee
Commercial Vehicle	\$300.00 Alternative Fuel Vehicle Registration and Renewal Fee

HIGHWAY IMPACT FEES – ALL VEHICLES (OVER 15,500 LBS EXCLUDING IRP REGISTERED VEHICLES)

All vehicles in the following weight classes will annually be assessed:

Vehicle Weights	15,500 to 26,000 pounds	26,001 pounds and over
High Impact Registration and Renewal Fee	\$50.00	\$100.00

Some vehicle owners may be required to provide Gross Vehicle Weight Rating (GVWR) upon registration or renewal. On the vehicle, the GVWR can be found on the door pillar of the driver's side of the vehicle. This can also usually be found with a quick Google search (i.e. 2004 Ford Ranger gross vehicle weight rating).
